

TABLE OF CONTENTS
BRIEF CALCULUS EXTENDED

<u>UNIT 1</u>	<u>LIMITS, CONTINUITY</u>	1
1.1	Limits, Continuity	1
1.2	More Limits, More Continuity, Intermediate Value Theorem	3
1.3	Infinite Limits, Limits at Infinity	5
1.4	Squeeze Theorem, Other Limits	6
	Unit 1 Summary	8
	Unit 1 Review Assignment	8
<u>UNIT 2</u>	<u>DIFFERENTIATION</u>	11
2.1	Limit Definition of the Derivative, Alternate Form of the Limit Def.	11
2.2	Derivative Rules (Short Cuts), Tangent Lines, Differentiability, Rates of Change.....	13
2.3	Position, Velocity, Acceleration, Calculator Differentiation	16
2.4	Derivatives of Sine, Cosine, Exponentials, Logs	19
2.5	Product and Quotient Rules, Trig Rules.....	20
	Unit 2 Summary	22
	Unit 2 Review Assignment	23
<u>UNIT 3</u>	<u>DIFFERENTIATION: COMPOSITE, IMPLICIT, INVERSE FUNCTIONS</u>	26
3.1	Chain Rule	26
3.2	Chain Rule with Exponentials and Logs Including Bases Other Than e	27
3.3	Implicit Differentiation	29
3.4	Related Rates	31
3.5	Derivatives of Inverse Function.....	33
3.6	Inverse Trig Definitions and Differentiation.....	34
	Unit 3 Summary	36
	Unit 3 Review Assignment	37
<u>UNIT 4</u>	<u>APPLICATIONS OF DIFFERENTIATION</u>	39
4.1	Approximating with the Tangent Line, Applications of Rates of Change	39
4.2	L'Hospital's Rule.....	41
4.3	Absolute Extrema and the Mean Value Theorem	43
4.4	Increasing/Decreasing Functions, First Derivative Test for Relative Extrema	46
4.5	Concavity and Points of Inflection, Second Derivative Test for Relative Extrema	48
	Unit 4 Summary	51
	Unit 4 Review Assignment	52
<u>UNIT 5</u>	<u>MORE APPLICATIONS OF DIFFERENTIATION</u>	55
5.1	Curve Sketching with Extrema and Points of Inflection	55
5.2	Graphing Derivatives and Antiderivatives from Graphs.....	56
5.3	Using Graphs of the First Derivative with Justification	58
5.4	Max/Min Applications (Optimization).....	60
	Unit 5 Summary	62
	Unit 5 Review Assignment	62
<u>UNIT 6</u>	<u>INTEGRATION</u>	67
6.1	Antidifferentiation, Indefinite Integrals	67
6.2	Reverse Chain Rule for Integrals and u -Substitution	69
6.3	The Fundamental Theorem of Calculus, Definite Integrals, Calculator Integration	72
6.4	The Second FTC, Integration Involving Natural Log Function	74
6.5	Integration Involving Inverse Trig Functions, Advanced Integration Techniques	76
6.6	Approximations using Riemann Sums and Trapezoids.....	78

6.7	Summation Notation, Integration by Parts	80
6.8	Partial Fractions, Improper Integrals	84
	Unit 6 Summary	87
	Unit 6 Review Assignment	89
UNIT 7 DIFFERENTIAL EQUATIONS		92
7.1	Solving Differential Equations, Verifying Solutions, Exp. Growth and Decay	92
7.2	Slope Fields, Euler's Method	95
7.3	Logistic Equations	103
	Unit 7 Summary	106
	Unit 7 Review Assignment	107
UNIT 8 APPLICATIONS OF INTEGRATION		111
8.1	Average Value of a Function, Arc Length , Interpretation of "Rate" Graphs	111
8.2	Area Between Curves	114
8.3	Volumes of Solids with Known Cross Sections (including Discs and Washers)	115
	Unit 8 Summary	119
	Unit 8 Review Assignment	120
UNIT 9 SERIES		123
9.1	Series Definitions, Geometric Series, nth Term Test	123
9.2	Power Series	127
9.3	Taylor Series	131
9.4	Elementary Series, Alternating Series	136
9.5	Error Approximations	141
9.6	Integral Test, p-Series	146
9.7	Comparison Tests	150
9.8	Ratio Test	153
9.9	Interval of Convergence	157
9.10	Absolute vs Conditional Convergence, Review	159
	Unit 9 Summary	162
UNIT 10 PARAMETRICS, POLARS, VECTORS		164
10.1	Parametric Equations	164
10.2	Polar Graphs	168
10.3	Polar Area	172
10.4	Polar Arc Length, Vector Definitions	175
10.5	Calculus of Vector Valued Functions	179
10.6	Review	182
	Unit 10 Summary	185
	List of Differentiation Formulas	186
	List of Integration Formulas	187
APPENDIX A		188
A-1	Shell Method Volume	188
A-2	Surface Area	192
A-3	Work	194
A-4	Hyperbolic Functions	196
A-5	Three-Dimensional Graphing	197
	Index	201

Topics shown in bold print are BC-only topics which have an in-depth presentation.
